

Study Tour

Futaba Region / Hisanohama District Course

Know about "Fukushima Now" !

As part of the "Revitalization and Disaster Prevention Program", Iwaki City will hold a study tour of Tomioka Town, Futaba Region, where the Evacuation Order of part of the town was lifted in April 2018, and Hisanohama District, where all residents had experienced evacuation due to the combined earthquake, tsunami, fire and nuclear power plant disasters of 2011.

This tour is for people who have come from overseas in order to teach them correct information about the current situation. And this tour also provides the chance to demonstrate the results of training for English interpreter volunteers. Explanations in English will be provided at each site that we visit. We'd like all of the ALTs to know and spread information about "Fukushima Now". In addition, please offer us your comments about the interpretation in English for this study tour. We are looking forward to your application.
